

# Magnumdisk™ Test Fixture

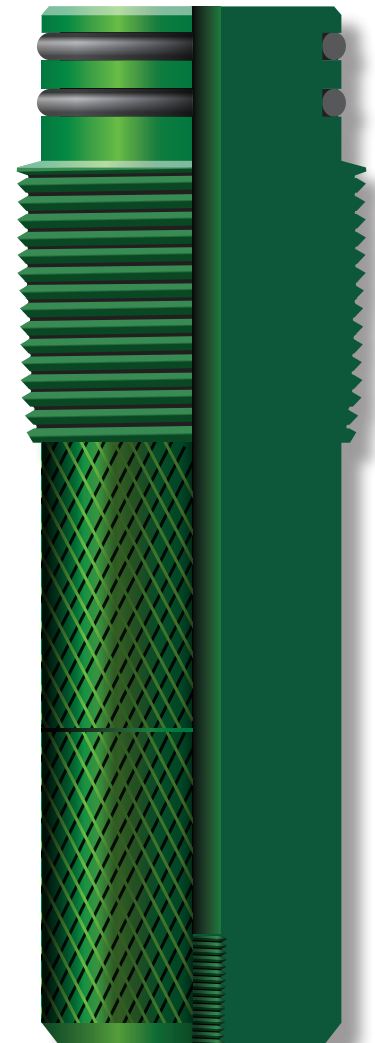

## For Testing Muleshoe Wireline Re-Entry Guide

### DESCRIPTION

This is an acme-threaded test fixture that can be quickly utilized to test the wireline re-entry guide end of the Single and Dual Magnumdisk™. A quick connect chuck is installed in the handle end of the test fixture. The test fixture is then installed in the muleshoe wire line re-entry. Connect the pump and the hose to the test fixture and apply the desired PSI test rating.

### FEATURES

- Allows testing of a **Magnumdisk™** with muleshoe wireline re-entry guide connection.
- Acme threads allow quick installation and removal of test fixture
- Substantial thread strength for high differential testing
- Standard 1/2" NPT thread for coupling installation
